

# PHILCOB JOSOL

## SOFTWARE ENGINEER

philcobsuzuki@gmail.com | [Portfolio](#) | [Github](#) | +639970832389

### SKILLS

**Languages:** JavaScript, TypeScript, Python, HTML, CSS

**Frameworks/Libraries:** ReactJS, NextJS, NestJS, ExpressJS, TailwindCSS, Bootstrap, Redux, MUI

**Databases:** MongoDB, SQL

**Developer Tools:** Git/Github, Visual Studio Code, Postman, Azure, Docker, AWS, CI/CD

### EXPERIENCE

Frontend Developer - 1210 Services Inc. | Full-time · Hybrid

Feb 2026 – Present

- Architected and delivered production-ready features end-to-end in a **Next.js 11 / React 17** large-scale frontend, owning the full cycle from implementation to **PR review and deployment**
- Built complex, reusable React UI components (overlays, modals, dynamic navigation) styled with **Material-UI v4 (JSS)** and driven by live **CMS data fetched via Axios REST APIs**
- Designed and maintained **Redux state management architecture**, including async thunk actions, selectors, and reducers across multiple feature modules
- Diagnosed and resolved production bugs in **JavaScript/JSX** across responsive layout breakpoints, filter/selection logic, and business-rule-driven bonus filtering
- Established **Jest unit testing infrastructure** from scratch, authored test coverage, and contributed to an existing Cypress E2E suite
- Led iterative code quality improvements through component decomposition, JSS style separation, and **React Hooks** refactoring, reducing complexity and improving maintainability
- Delivered **SEO enhancements** using semantic HTML within a **Next.js SSR architecture**, improving page discoverability

Software Engineer - Career Team | Full-time · Remote

Nov 2024 – Nov 2025

- Developed reusable UI components using **Next.js** with **TypeScript** and integrated **RESTful APIs** to support the management of jobseekers and employers, including role-based interface rendering.
- Implemented **RESTful API** endpoints using **NestJS** and integrated them seamlessly into the frontend, enabling smooth and real-time data interaction between client and server.
- Wrote **custom React hooks** to handle tasks such as data fetching, form logic, and state updates, improving reusability and reducing repetitive code across components.
- Implemented **JWT-based authentication and authorization**, handling secure login, token validation, protected routes, and role-based access control across the platform.
- Integrated AI services using the **OpenAI API** for features such as resume analysis, content generation, and data enhancement within the system.
- Implemented **AWS S3** file storage using signed URLs for secure file uploads and downloads, ensuring data privacy and controlled access.
- Worked with **AWS Cognito** for user authentication and identity management, supporting secure user registration, login, and token-based sessions.

- Handled MongoDB aggregation pipelines to retrieve and transform data across multiple collections using referenced IDs, and integrated the results into Domo dashboards for reporting and analytics.
- Collaborated with cross-functional teams to implement API endpoints using NestJS and MongoDB, ensuring accurate and secure data delivery across the platform.
- Deployed new features and bug fixes through Azure DevOps pipelines, contributing to faster and more reliable release cycles.
- Deployed additional features and fixes using GitHub Actions workflows, and participated in production releases as part of the deployment team.
- Investigated and resolved frontend defects caused by unexpected backend data using Postman to inspect API responses and identify mismatches, resulting in more stable user-facing components.
- Participated in the full software development life cycle, including daily stand-ups, sprint planning, estimations, code reviews, and design sessions.
- Worked closely with stakeholders to gather and translate business requirements into functional and scalable technical solutions.
- Participated in the PIRL (Participant Individual Record Layout) Post-Processing Team, using Python scripts to validate, clean, and fix PIRL CSV files for government system submissions.
- Used Docker for local development and environment standardization, containerizing frontend and backend services for consistent builds and easier deployment.
- Handled ReactJS technical interviews for software development applicants and mentored newly hired junior developers.

#### Frontend Developer - Comfort Financial Solutions · Remote

Sep 2023 – Jan 2024

- Developed responsive web interfaces using **ReactJS, HTML, CSS, and TypeScript**.
- Collaborated with UX/UI designers to translate mockups into functional applications.
- Integrated **RESTful APIs** and third-party services to deliver dynamic, data-driven features.
- Optimized front-end performance and maintained code quality through **Git** version control and testing.
- Built reusable React components and **custom hooks** to streamline development and promote consistent, maintainable code across the application.
- Developed an interactive timeline feature where agents can post, comment, and react, enhancing user engagement and collaboration.
- Integrated **API endpoints** to support real-time updates and seamless data synchronization throughout the application.
- Participated in **daily standups and story point estimations**, contributing to sprint planning and continuous delivery.

## FREELANCE

---

FFWPU Philippines Website <https://ffwpuph.com/>

June 2021

- Created secured user authentication using **JSON Web Token** with verification of email using **EmailJS**
- Created admin interfaces to handle **CRUD operations** for the website contents such as News Post, Upcoming events, and Word Of The Day.
- Built dynamic pages for church branches, special celebrations, and historical timelines using **Next.js** dynamic routing and server-side rendering for **SEO** optimization.
- Designed and maintained a responsive, mobile-friendly UI with **Tailwind CSS** and **shadcn/ui**, achieving a clean, modern layout consistent with FFWPU's identity.
- Integrated YouTube playlists, photo galleries, and contact forms to enhance interactivity and engagement across pages.
- Deployed and managed the website on **Vercel**, leveraging **GitHub Actions** for continuous integration and version control.
- Implemented smooth scroll navigation, reusable section components, and metadata optimization for better accessibility and discoverability.

## EDUCATION

---

Bachelor of Science in Information Technology

June 2021
